Fund Summary

Investment Objective

The fund seeks long-term total return (consisting of capital growth and income).

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses*

(Expenses that you pay each year as a percentage of the value of your investment)

Management fees	0.65%
Distribution and service (12b-1) fees	None
Other expenses	0.00%
Total annual fund operating expenses	0.65%

* The fund's management agreement provides that BNY Mellon ETF Investment Adviser, LLC (Adviser), the fund's investment adviser, will pay substantially all expenses for the fund, except for the management fees, payments under the fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions, costs of holding shareholder meetings, fees and expenses associated with any securities lending program to be adopted by the fund, and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the fund's business.

Example

The Example is intended to help you compare the cost of investing in the fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the fund for the time periods indicated and then hold or redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$66	\$208	\$362	\$810

Portfolio Turnover

The fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the fund's performance. The fund's portfolio turnover rate for the fiscal period from November 3, 2022 (the fund's commencement of operations) through October 31, 2023 was 53.98% of the average value of its portfolio.

Principal Investment Strategy

To pursue its goal, the fund normally invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in securities issued by dividend-paying infrastructure companies. The fund's sub-adviser, Newton Investment Management North America LLC (NIMNA), an affiliate of the Adviser, seeks to select for the fund securities of infrastructure companies that NIMNA believes benefit from consistent regulatory environments (a feature more common in developed markets than emerging markets), stable cash flows driven by sustainable business models, and consistent dividend payment profiles. NIMNA utilizes quantitative and fundamental research to select investments by focusing on infrastructure companies that it believes possess the most favorable combination of cash flow stability, dividend payment potential, and valuation metrics (such as price to earnings ratio, price to book ratio, and price to cash flow ratio). NIMNA's fundamental research includes evaluating key areas such as balance sheet strength, competitive landscape, stock-price valuations, liquidity, and analysis of regulatory environment. The fund is expected to invest

principally in common stocks of companies, including shares of real estate investment trusts (REITs), located in a number of different countries, including the United States. NIMNA considers a dividend paying company to be a company that is projected to pay a dividend in the next 12 months, based on industry consensus yield forecasts.

Additionally, the fund targets, but does not guarantee, an annualized gross forward-looking 12-month yield of 6% or more for its portfolio (the "targeted yield"). The targeted yield represents the forward-looking yield of the fund's portfolio securities in the aggregate over the next 12 months, calculated before fund fees, expenses, and taxes, and does not represent the amount of distributions payable to fund shareholders. The targeted yield is based on the dividend yield of the securities in the portfolio. The fund's targeted yield is based on the securities in the portfolio in the aggregate and the fund may hold individual securities with a higher or lower individual yield than the targeted yield. The security yield data is sourced from an independent third-party data provider and made up of industry consensus yield forecasts. If the forward-looking yield of the fund's portfolio falls below the targeted yield, NIMNA may sell securities and reallocate the fund's assets in an effort to maintain the targeted yield. There can be no assurance, and there is no certainty, that the fund will be able to achieve such targeted yield or any particular level of yield.

Infrastructure refers to the structures, networks, systems and facilities necessary for the operation, function, growth or development of a society or economy. NIMNA considers an infrastructure company to be a company that derives at least 50% of its revenues or profits from, or devotes at least 50% of its assets to, the ownership, management, development, construction, renovation, enhancement, operation or servicing of infrastructure assets. Examples of infrastructure assets include, but are not limited to, utility assets (such as electric transmission and distribution lines, gas distribution pipelines, water pipelines and treatment facilities, and sewer facilities), energy assets (such as oil and gas pipelines, storage facilities, and other facilities used for gathering, processing, or transporting hydrocarbon products as well as contracted renewable power assets), industrials assets (such as capital goods and transportation), communication services assets (such as communications towers, data centers, fiber networks, and satellites), real estate assets (such as equity REITs) and health care assets (such as health care equipment). NIMNA seeks exposure to companies operating in industries involved with "traditional" infrastructure assets, which currently include the utilities, energy and industrials industries, as well as companies operating in industries involved with "non-traditional" infrastructure assets, which currently include the communication services, real estate and health care industries. The fund may have exposure to a portion or all of these industries at any given time depending on NIMNA's assessment of economic, political or regulatory occurrences affecting each infrastructure asset category. The fund's investments are concentrated (i.e., more than 25% of the fund's total assets) in the securities of issuers in the infrastructure group of industries.

The fund invests in securities of companies located throughout the world, including in the United States. Under normal market conditions, the fund will invest at least 40% of its net assets, unless market conditions are deemed unfavorable by NIMNA (and in all cases, at least 30% of its net assets), in foreign companies. The fund considers a foreign company to be a company organized or with its principal place of business in, or that has a majority of its assets or business in, or whose securities are primarily listed or traded on exchanges in, a country outside the United States. The fund will normally maintain investments in companies economically tied to a minimum of three countries, one of which may be the United States. In addition, the fund may invest up to 25% of its net assets in stocks of companies located in emerging market countries. The fund considers emerging market countries to be all countries represented in the Morgan Stanley Capital International Emerging Markets Index. Certain of the fund's investments may be denominated in foreign currencies. The currency exposure of the fund's portfolio is generally unhedged to the U.S. dollar. The fund may, from time to time, invest a significant portion (more than 20%) of its total assets in securities of companies located in a particular country or region. As of the date of this Prospectus, in addition to the United States, the fund has significant exposure to securities of companies located in the European region, particularly France.

The fund may invest in securities of companies with any market capitalization. As part of its ongoing review of portfolio holdings, NIMNA may sell a security when NIMNA identifies that the company has weakness in its business model, increased exposure to economic, regulatory or political risk, or lower than expected dividend payments. NIMNA also may sell a security when it identifies a more promising investment opportunity.

The fund is non-diversified.

Principal Risks

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the Federal Deposit Insurance Corporation (FDIC) or any other government agency. It is not a complete investment program. The fund's share price fluctuates, sometimes dramatically, which means you could lose money.

- *Infrastructure company risk.* Because the fund invests significantly in companies that are engaged in the infrastructure business, the fund is more susceptible to adverse economic, regulatory, political, legal and other changes affecting such companies. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, costs associated with

environmental and other regulations, difficulty in raising capital in adequate amounts on reasonable terms in periods of high inflation or unsettled capital markets, the effects of economic slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies, service interruption due to environmental, operational or other mishaps, and other factors. Additionally, infrastructure companies may be subject to regulation by various governmental authorities and may also be affected by governmental regulation of rates charged to customers; service interruption and/or legal challenges due to environmental, operational or other mishaps; the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards; nationalization; and general changes in market sentiment towards infrastructure assets. There is also the risk that corruption may negatively affect publicly-funded infrastructure projects, resulting in delays and cost overruns. At times, the performance of securities of companies in the infrastructure group of industries may lag the performance of other industries or the broader market as a whole. A downturn in the infrastructure group of industries could have an adverse impact on the fund.

- *Concentration risk.* Because the fund concentrates its investments in securities of issuers in the infrastructure group of industries, the fund may be subject to greater risks and market fluctuations than a fund whose portfolio has exposure to a broader range of industries. The fund is particularly susceptible to financial, economic, political, or market events, as well as government regulation, impacting the infrastructure group of industries. The fund is subject to the risk that: (i) its performance will be closely tied to the performance of those particular industries; (ii) its performance will be adversely impacted when such industries experience a downturn; and (iii) it will perform poorly during a slump in demand for securities of companies in such industries.
- *Risks of stock investing.* Stocks generally fluctuate more in value than bonds and may decline significantly over short time periods. There is the chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising prices and falling prices. The market value of a stock may decline due to general market conditions or because of factors that affect the particular company or the company's industry.
- *Dividend-paying stock risk.* There is no guarantee that the issuers of the stocks held by the fund will pay dividends in the future or that, if dividends are paid, they will remain at their current levels or increase over time. The fund's emphasis on dividend-paying stocks could cause the fund to underperform similar funds that invest without consideration of a company's track record of paying dividends or ability to pay dividends in the future. Dividend-paying stocks may not participate in a broad market advance to the same degree as other stocks, and a sharp rise in interest rates or economic downturn could cause a company to unexpectedly reduce or eliminate its dividend.
- *Target yield risk.* The fund seeks to achieve a targeted yield, which is dependent in part on the ability of the fund's portfolio managers to allocate effectively the fund's assets. There can be no assurance, and there is no guarantee, that the actual allocations of the fund's assets will be able to meet any targeted yield or achieve any particular level of yield over time. Companies may reduce their dividends or may not raise their dividends in periods when their share prices appreciate, which will negatively impact the fund's ability to meet the target yield. This risk is increased in periods of market appreciation. The fund's targeted yield represents the forward-looking yield of the fund's portfolio securities in the aggregate over the next 12 months, calculated before fund fees, expenses, and taxes, and does not represent the amount of distributions payable to fund shareholders. In seeking to achieve a targeted yield, the fund may forgo opportunities to buy certain securities when it might otherwise be advantageous to do so or sell securities when it might otherwise be disadvantageous for the fund to do so. Seeking a targeted yield may also cause the fund to underperform similar funds that do not seek a targeted yield.
- *REIT risk.* Investments in REITs expose the fund to risks similar to investing directly in real estate. REITs are characterized as equity REITs, mortgage REITs and hybrid REITs, which combine the characteristics of both equity and mortgage REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depends upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs generally hold both ownership interests and mortgage interests in real estate. The value of securities issued by REITs is affected by tax and regulatory requirements and by perceptions of management skill. They also may be affected by general economic conditions and are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation at an economically disadvantageous time, and the possibility of failing to qualify for favorable tax treatment under applicable U.S. or foreign law and/or to maintain exempt status under the 1940 Act. To the extent a REIT owns properties of, or makes loans to, companies concentrated in a particular industry or geographic region, the REIT will also be subject to risks affecting such industries and regions. When the fund invests in a REIT, shareholders of the fund will bear indirectly their proportionate share of the expenses of the REIT in addition to expenses of the fund.

- *Market capitalization risk (small-, mid- and large-cap stock risk).* To the extent the fund emphasizes investments in small-, mid- or large-cap stocks, it will assume the associated risks. At any given time, any of these market capitalizations may be out of favor with investors. Compared to small- and mid-cap companies, large-cap companies may be less responsive to changes and opportunities affecting their business. To the extent the fund invests in small- and mid-cap companies, it will be subject to additional risks because the operating histories of these companies tend to be more limited, their earnings and revenues less predictable (and some companies may be experiencing significant losses), and their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. Smaller companies may have limited product lines, markets or financial resources, or may depend on a limited management group.
- *Foreign investment risk.* Because the fund invests in foreign securities, the fund's performance will be influenced by political, social and economic factors affecting investments in foreign issuers. Special risks associated with investments in foreign issuers include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political and economic instability and differing auditing and legal standards. The imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or problems related to share registration, trade settlement, or asset custody, may result in losses for the fund. Investments denominated in foreign currencies are subject to the risk that such currencies will decline in value relative to the U.S. dollar and affect the value of these investments held by the fund. To the extent securities held by the fund trade in a market that is closed when the exchange on which the fund's shares trade is open, there may be deviations between the current price of a security and the last quoted price for the security in the closed foreign market. These deviations could result in the fund experiencing premiums or discounts greater than those of ETFs that invest in domestic securities. To the extent the fund's investments are focused in a limited number of foreign countries, the fund's performance could be more volatile than that of more geographically diversified funds.
- *Market risk.* The value of the securities in which the fund invests may be affected by political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets may negatively affect many issuers, which could adversely affect the fund. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies world-wide. A widespread outbreak of an infectious illness, such as COVID-19, and efforts to contain its spread, may result in market volatility, inflation, reduced liquidity of certain instruments, disruption in the trading of certain instruments, and systemic economic weakness. To the extent the fund may overweight its investments in certain countries, companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
- *Management risk.* The investment process used by the fund's sub-adviser could fail to achieve the fund's investment goal and cause your fund investment to lose value.
- *European risk.* To the extent the fund invests significantly in the securities of issuers located in the European region, the fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests. Any adverse economic or political events in Europe may cause the fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. Countries in Europe will be significantly affected by the fiscal and monetary controls of the Economic and Monetary Union of the European Union (EU). Changes in regulations on trade, decreasing imports or exports, changes in the exchange rate of the Euro, the default or threat of default by an EU member country on its sovereign debt, and recessions among European countries may have a significant adverse effect on the economies of other European countries. In addition, one or more countries may abandon the Euro and/or withdraw from the EU, such as the United Kingdom's (the "U.K.'s") formal exit on January 31, 2020, which could potentially have an adverse effect on the value of the fund's investments. There is still considerable uncertainty relating to the potential consequences associated with the U.K.'s exit and whether the exit will increase the likelihood of other countries also departing the EU.
- *France risk.* To the extent the fund invests significantly in the securities of French companies, the fund will be subject to legal, regulatory, political, currency, security, and economic risks specific to France. Recently, concerns have emerged with respect to the economic outlook for certain EU countries, including France. As a result, the French economy has experienced significant volatility and adverse trends due to concerns about a prolonged economic downturn and rising government debt levels. The French economy is dependent on agricultural exports, and as a

result, is susceptible to fluctuations in demand for agricultural products.

- *Emerging market risk.* The securities of issuers located or doing substantial business in emerging market countries tend to be more volatile and less liquid than the securities of issuers located in countries with more mature economies. There may be less information publicly available about an emerging market issuer than about a developed market issuer and/or the available information may be outdated or unreliable. In addition, emerging market issuers may not be subject to accounting, auditing, legal and financial reporting standards comparable to those in developed markets, potentially making it difficult to evaluate such issuers. Emerging markets generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Additionally, investments in these countries may have restrictions that make it difficult or impossible for the fund to exercise rights, pursue legal remedies, and obtain judgements in foreign courts. Investments in these countries may be subject to political, economic, legal, market and currency risks. The risks may include less protection of property rights and uncertain political and economic policies, greater vulnerability to market manipulation, the imposition of capital controls and/or foreign investment limitations by a country, nationalization of businesses and the imposition of sanctions by other countries, such as the United States.
- *Issuer risk.* A security's market value may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services, or factors that affect the issuer's industry, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Authorized participants, market makers and liquidity providers risk.* The fund has a limited number of financial institutions that may act as Authorized Participants, which are responsible for the creation and redemption activity for the fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, fund shares may trade at a material discount to net asset value and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Fluctuation of net asset value, share premiums and discounts risk.* As with all exchange-traded funds, fund shares may be bought and sold in the secondary market at market prices. The trading prices of fund shares in the secondary market may differ from the fund's daily net asset value per share and there may be times when the market price of the shares is more than the net asset value per share (premium) or less than the net asset value per share (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- *Trading issues risk.* Although fund shares are listed for trading on an exchange and may be listed or traded on other U.S. and non-U.S. stock exchanges as well, there can be no assurance that an active trading market for such fund shares will develop or be maintained. Trading in fund shares may be halted due to market conditions or for reasons that, in the view of the listing exchange, make trading in fund shares inadvisable. In addition, trading in fund shares on an exchange is subject to trading halts caused by extraordinary market volatility pursuant to exchange "circuit breaker" rules. There can be no assurance that the requirements of the listing exchange necessary to maintain the listing of the fund will continue to be met or will remain unchanged or that fund shares will trade with any volume, or at all, on any stock exchange.
- *Limited operating history risk.* The fund is recently organized with limited operating history and there can be no assurance that the fund will grow to or maintain sufficient assets to achieve investment and trading efficiencies.
- *Non-diversification risk.* The fund is non-diversified, which means that the fund may invest a relatively high percentage of its assets in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

Performance

The following bar chart and table provide some indication of the risks of investing in the fund. The bar chart shows the performance of the fund for its first complete calendar year of operations. The table compares the average annual total returns of the fund to those of a broad measure of market performance. The fund's past performance (before and after taxes) is not necessarily an indication of how the fund will perform in the future. Recent performance information may be available at www.im.bnymellon.com.

Year-by-Year Total Returns as of 12/31 each year (%)

Year	Total Return (%)
14	14.56
15	15.56
16	16.56
17	17.56
18	18.56
19	19.56
20	20.56
21	21.56
22	22.56
23	-9.31

Best Quarter
Q4, 2023: 9.56%

Worst Quarter
Q3, 2023: -6.94%

(for the periods reflected in the bar chart)

After-tax returns in the table below are calculated using the historical highest individual federal marginal income tax rates, and do not reflect the impact of state and local taxes. Actual after-tax returns depend on the investor's tax situation and may differ from those shown, and the after-tax returns shown are not relevant to investors who hold their shares through U.S. tax-deferred arrangements such as 401(k) plans or individual retirement accounts.

Average Annual Total Returns as of 12/31/23		
	1 Year	Since Inception (11/3/2022)
Returns before taxes	9.31%	15.10%
Returns after taxes on distributions	7.27%	13.03%
Returns after taxes on distributions and sale of fund shares	5.46%	10.63%
S&P Global Infrastructure NR Index (reflects no deductions for fees, expenses or taxes)	5.78%	9.94%

Portfolio Management

The fund's investment adviser is BNY Mellon ETF Investment Adviser, LLC and the fund's sub-adviser is Newton Investment Management North America LLC, an affiliate of the Adviser.

James A. Lydotes, CFA and Brock Campbell, CFA are the fund's primary portfolio managers. Mr. Lydotes has been the lead primary portfolio manager and Mr. Campbell has been a primary portfolio manager of the fund since its inception in November, 2022. Mr. Lydotes is deputy chief investment officer of equity at NIMNA. Mr. Campbell is the head of global equity research at NIMNA. Each portfolio manager is jointly and primarily responsible for the day-to-day management of the fund's portfolio.

Purchase and Sale of Fund Shares

The fund will issue (or redeem) fund shares to certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of fund shares known as "Creation Units." Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the fund and/or cash.

Individual fund shares may only be purchased and sold on the Cboe BZX Exchange, Inc., other national securities exchanges, electronic crossing networks and other alternative trading systems through your broker-dealer at market prices. Because fund shares trade at market prices rather than at net asset value, fund shares may trade at a price greater than net asset value (premium) or less than net asset value (discount). When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the fund (bid) and the lowest price a seller is willing to accept for shares of the fund (ask) (the "bid-ask spread"). Recent information regarding the fund's net asset value, market price, premiums and discounts, and bid-ask spreads is available at www.im.bnymellon.com.

Tax Information

The fund's distributions are taxable as ordinary income or capital gains, except when your investment is through an individual retirement account (IRA), Retirement Plan or other U.S. tax-advantaged investment plan (in which case you may be taxed upon withdrawal of your investment from such account).

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase fund shares through a broker-dealer or other financial intermediary (such as a bank), the Adviser or its affiliates may pay the financial intermediary for certain activities related to the fund, including educational training programs, conferences, the development of technology platforms and reporting systems, or other services related to the sale or promotion of the fund. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Fund Details

Goal and Approach

The fund seeks long-term total return (consisting of capital growth and income). The fund's investment objective may be changed by the fund's board without shareholder approval. To pursue its goal, the fund normally invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in securities issued by dividend-paying infrastructure companies. The fund's investment policy with respect to the investment of at least 80% of its net assets may be changed by the fund's board, upon 60 days' prior notice to shareholders.

The fund's sub-adviser, Newton Investment Management North America LLC (NIMNA), an affiliate of the Adviser, seeks to select for the fund securities of infrastructure companies that NIMNA believes benefit from consistent regulatory environments (a feature more common in developed markets than emerging markets), stable cash flows driven by sustainable business models, and consistent dividend payment profiles. NIMNA utilizes quantitative and fundamental research to select investments by focusing on infrastructure companies that it believes possess the most favorable combination of cash flow stability, dividend payment potential, and valuation metrics, such as price to earnings ratio (ratio of a company's stock price per share to its earnings per share), price to book ratio (ratio of a company's stock price per share to its book value per share) and price to cash flow ratio (ratio of a company's stock price per share to its operating cash flow per share). NIMNA's fundamental research includes evaluating key areas such as balance sheet strength, competitive landscape, stock-price valuations, liquidity, and analysis of regulatory environment. In assessing the stability of a company's cash flows, NIMNA analyzes the viability of the company's growth strategy, its competitive position and general industry conditions. NIMNA also identifies the country and company level economic, regulatory, and political risk impacting each company it considers for investment. NIMNA then selects companies which it believes are best placed to withstand or have more limited exposure to such risks due to the particular company's competitive advantages, such as the age, quality, and replacement cost of its infrastructure assets (and therefore the sustainability of its cash flows). The fund is expected to invest principally in common stocks of companies, including shares of real estate investment trusts (REITs), located in a number of different countries, including the United States. REITs are pooled investment vehicles that invest primarily in income-producing real estate or loans related to real estate. NIMNA considers a dividend paying company to be a company that is projected to pay a dividend in the next 12 months, based on industry consensus yield forecasts. The key criteria by which NIMNA assesses companies is applied to all investments by the fund except for temporary investments or investments in cash equivalents.

Additionally, the fund targets, but does not guarantee, an annualized gross forward-looking 12-month yield of 6% or more for its portfolio (the "targeted yield"). The targeted yield represents the forward-looking yield of the fund's portfolio securities in the aggregate over the next 12 months, calculated before fund fees, expenses, and taxes, and does not represent the amount of distributions payable to fund shareholders. The targeted yield is based on the dividend yield of the securities in the portfolio. The fund's targeted yield is based on the securities in the portfolio in the aggregate and the fund may hold individual securities with a higher or lower individual yield than the targeted yield. The security yield data is sourced from an independent third-party data provider and made up of industry consensus yield forecasts. With respect to any REITs or other pooled investment vehicles, the dividend yield calculation includes any return of capital distributed by such security. If the forward-looking yield of the fund's portfolio falls below the targeted yield, NIMNA may sell securities and reallocate the fund's assets in an effort to maintain the targeted yield. There can be no assurance, and there is no certainty, that the fund will be able to achieve such targeted yield or any particular level of yield.

Infrastructure refers to the structures, networks, systems and facilities necessary for the operation, function, growth or development of a society or economy. NIMNA considers an infrastructure company to be a company that derives at least 50% of its revenues or profits from, or devotes at least 50% of its assets to, the ownership, management, development, construction, renovation, enhancement, operation or servicing of infrastructure assets. Examples of infrastructure assets include, but are not limited to, utility assets (such as electric transmission and distribution lines, gas distribution pipelines, water pipelines and treatment facilities, and sewer facilities), energy assets (such as oil and gas pipelines, storage facilities, and other facilities used for gathering, processing, or transporting hydrocarbon products as well as contracted renewable power assets), industrials assets (such as capital goods and transportation), communication services assets (such as communication towers, data centers, fiber networks, and satellites), real estate assets (such as equity REITs) and health care assets (such as health care equipment). NIMNA seeks exposure to companies operating in industries involved with "traditional" infrastructure assets, which currently include the utilities, energy and industrials

industries, as well as companies operating in industries involved with "non-traditional" infrastructure assets, which currently include the communication services, real estate and health care industries. The fund may have exposure to a portion or all of these industries at any given time depending on NIMNA's assessment of economic, political or regulatory occurrences affecting each infrastructure asset category. The fund's investments are concentrated (i.e., more than 25% of the fund's total assets) in the securities of issuers in the infrastructure group of industries.

The fund invests in securities of companies located throughout the world, including in the United States. Under normal market conditions, the fund will invest at least 40% of its net assets, unless market conditions are deemed unfavorable by NIMNA (and in all cases, at least 30% of its net assets), in foreign companies. The fund considers a foreign company to be a company organized or with its principal place of business in, or that has a majority of its assets or business in, or whose securities are primarily listed or traded on exchanges in, a country outside the United States. The fund will normally maintain investments in companies economically tied to a minimum of three countries, one of which may be the United States. In addition, the fund may invest up to 25% of its net assets in stocks of companies located in emerging market countries. The fund considers emerging market countries to be all countries represented in the Morgan Stanley Capital International Emerging Markets Index. Certain of the fund's investments may be denominated in foreign currencies. The currency exposure of the fund's portfolio is generally unhedged to the U.S. dollar. The fund may, from time to time, invest a significant portion (more than 20%) of its total assets in securities of companies located in a particular country or region. As of the date of this Prospectus, in addition to the United States, the fund has significant exposure to securities of companies located in the European region, particularly France.

The fund may invest in securities of companies with any market capitalization. Although not a principal strategy, the fund's investments also may include depositary receipts and exchange-traded funds (ETFs).

As part of its ongoing review of portfolio holdings, NIMNA may sell a security when NIMNA identifies that the company has weakness in its business model, increased exposure to economic, regulatory or political risk, or lower than expected dividend payments. NIMNA also may sell a security when it identifies a more promising investment opportunity.

Although not a principal investment strategy, the fund may lend its portfolio securities to brokers, dealers and other financial institutions. Loans of portfolio securities may not exceed 33-1/3% of the value of the fund's total assets.

Under adverse market conditions, the fund may take temporary defensive positions that are inconsistent with its principal investment strategies by holding cash or investing, without limit, in U.S. Treasury securities or money market instruments. When this allocation happens, the fund may not achieve its investment objective. During periods when the fund invests for temporary defensive purposes, its assets may not be concentrated in the securities of issuers in the infrastructure group of industries.

The fund is non-diversified.

Investment Risks

An investment in the fund is not a bank deposit. It is not insured or guaranteed by the FDIC or any other government agency. It is not a complete investment program. The value of your investment in the fund will fluctuate, sometimes dramatically, which means you could lose money.

- *Infrastructure company risk.* Because the fund invests significantly in companies that are engaged in the infrastructure business, the fund is more susceptible to adverse economic, regulatory, political, legal and other changes affecting such companies. Infrastructure companies are subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, costs associated with environmental and other regulations, difficulty in raising capital in adequate amounts on reasonable terms in periods of high inflation or unsettled capital markets, the effects of economic slowdown and surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies, service interruption due to environmental, operational or other mishaps, and other factors. Additionally, infrastructure companies may be subject to regulation by various governmental authorities and may also be affected by governmental regulation of rates charged to customers; service interruption and/or legal challenges due to environmental, operational or other mishaps; the imposition of special tariffs and changes in tax laws, regulatory policies and accounting standards; nationalization; and general changes in market sentiment towards infrastructure assets. There is also the risk that corruption may negatively affect publicly-funded infrastructure projects, resulting in delays and cost overruns. Companies operating in the infrastructure industry also face operating risks, including the risk of fire, explosions, leaks, mining and drilling accidents or other catastrophic events. In addition, natural risks, such as earthquakes, floods, lightning, hurricanes, tsunamis and wind, are inherent risks in infrastructure company operations. At times, the performance of securities of companies in the infrastructure group of industries may lag the performance of other industries or the broader market as a whole. A downturn in the infrastructure group of industries could have an adverse impact on the fund.

Specific infrastructure companies in which the fund invests may be subject to the following additional risks:

- Utilities company revenues and costs are subject to regulation by states and other regulators. Regulatory authorities also may restrict a company's access to new markets. Utilities companies may incur unexpected increases in fuel and other operating costs. Utilities companies are also subject to considerable costs associated with environmental compliance, nuclear waste clean-up and safety regulation.
- Energy infrastructure companies are subject to adverse changes in fuel prices, the effects of energy conservation policies and other risks, such as increased regulation, negative effects of economic slowdowns, reduced demand, cleanup and litigation costs as a result of environmental damage, changing and international politics and regulatory policies of various governments. Natural disasters or terrorist attacks damaging sources of energy supplies will also negatively impact energy infrastructure companies.
- Industrial infrastructure companies can be significantly affected by general economic trends, changes in consumer sentiment and spending, commodity prices, legislation, government regulation and spending, exchange rates, import controls, worldwide competition, technological developments, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control. In addition, industrial infrastructure companies focused on transportation can also be significantly affected by economic changes, fuel prices, labor relations, insurance costs and government regulations, as well as potentially be negatively impacted by natural disasters or terrorist attacks.
- Communication services infrastructure companies are subject to risks involving changes in government regulation, competition, dependency on patent protection, equipment incompatibility, changing consumer preferences, technological obsolescence and large capital expenditures and debt burdens.
- Real estate infrastructure companies have many of the same risks as direct ownership of real estate. These risks include, among others: declines in the value of real estate; risks related to general and local economic conditions; possible lack of availability of mortgage funds or other limits to accessing the credit or capital markets; defaults by borrowers or tenants, particularly during an economic downturn; and changes in interest rates. The real estate market is highly sensitive to general and local economic conditions and developments and is characterized by intense competition and periodic overbuilding. Real estate values have been subject to substantial fluctuations and declines on a local, regional and national basis in the past and may continue to be in the future. Real estate infrastructure companies who own or service properties of companies that are concentrated in a particular industry or geographic region are also subject to risks affecting such industries and regions.
- Health care infrastructure companies are subject to government regulation and reimbursement rates, as well as government approval of products and services, which could have a significant effect on price and availability.

Health care infrastructure companies can be significantly affected by product liability claims, pricing pressure, rapid obsolescence of products or services, and patent expirations.

- *Concentration risk.* Because the fund concentrates its investments in securities of issuers in the infrastructure group of industries, the fund may be subject to greater risks and market fluctuations than a fund whose portfolio has exposure to a broader range of industries. The fund is particularly susceptible to financial, economic, political, or market events, as well as government regulation, impacting the infrastructure group of industries. The fund is subject to the risk that: (i) its performance will be closely tied to the performance of those particular industries; (ii) its performance will be adversely impacted when such industries experience a downturn; and (iii) it will perform poorly during a slump in demand for securities of companies in such industries.
- *Risks of stock investing.* Stocks generally fluctuate more in value than bonds and may decline significantly over short time periods. There is the chance that stock prices overall will decline because stock markets tend to move in cycles, with periods of rising prices and falling prices. The market value of a stock may decline due to general market conditions that are not related to the particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. A security's market value also may decline because of factors that affect the particular company, such as management performance, financial leverage and reduced demand for the company's products or services, or factors that affect the company's industry, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Dividend-paying stock risk.* There is no guarantee that the issuers of the stocks held by the fund will pay dividends in the future or that, if dividends are paid, they will remain at their current levels or increase over time. The fund's emphasis on dividend-paying stocks could cause the fund to underperform similar funds that invest without consideration of a company's track record of paying dividends or ability to pay dividends in the future. Dividend-paying stocks may not participate in a broad market advance to the same degree as other stocks, and a sharp rise in interest rates or economic downturn could cause a company to unexpectedly reduce or eliminate its dividend.
- *Target yield risk.* The fund seeks to achieve a targeted yield, which is dependent in part on the ability of the fund's portfolio managers to allocate effectively the fund's assets. There can be no assurance, and there is no guarantee, that the actual allocations of the fund's assets will be able to meet any targeted yield or achieve any particular level of yield over time. Companies may reduce their dividends or may not raise their dividends in periods when their share prices appreciate, which will negatively impact the fund's ability to meet the target yield. This risk is increased in periods of market appreciation. The fund's targeted yield represents the forward-looking yield of the fund's portfolio securities in the aggregate over the next 12 months, calculated before fund fees, expenses, and taxes, and does not represent the amount of distributions payable to fund shareholders. In seeking to achieve a targeted yield, the fund may forgo opportunities to buy certain securities when it might otherwise be advantageous to do so or sell securities when it might otherwise be disadvantageous for the fund to do so. Seeking a targeted yield may also cause the fund to underperform similar funds that do not seek a targeted yield.
- *REIT risk.* Investments in REITs expose the fund to risks similar to investing directly in real estate. REITs are characterized as equity REITs, mortgage REITs and hybrid REITs, which combine the characteristics of both equity and mortgage REITs. Equity REITs, which may include operating or finance companies, own real estate directly and the value of, and income earned by, the REITs depends upon the income of the underlying properties and the rental income they earn. Equity REITs also can realize capital gains (or losses) by selling properties that have appreciated (or depreciated) in value. Mortgage REITs can make construction, development or long-term mortgage loans and are sensitive to the credit quality of the borrower. Mortgage REITs derive their income from interest payments on such loans. Hybrid REITs generally hold both ownership interests and mortgage interests in real estate. The value of securities issued by REITs is affected by tax and regulatory requirements and by perceptions of management skill. They also may be affected by general economic conditions and are subject to heavy cash flow dependency, defaults by borrowers or tenants, self-liquidation at an economically disadvantageous time, and the possibility of failing to qualify for favorable tax treatment under applicable U.S. or foreign law and/or to maintain exempt status under the 1940 Act. To the extent a REIT owns properties of, or makes loans to, companies concentrated in a particular industry or geographic region, the REIT will also be subject to risks affecting such industries and regions. When the fund invests in a REIT, shareholders of the fund will bear indirectly their proportionate share of the expenses of the REIT in addition to expenses of the fund.
- *Market capitalization risk (small-, mid- and large-cap stock risk).* To the extent the fund emphasizes investments in small-, mid- or large-cap stocks, it will assume the associated risks. At any given time, any of these market capitalizations may be out of favor with investors. Compared to small- and mid-cap companies, large-cap companies may be less responsive to changes and opportunities affecting their business. To the extent the fund invests in small- and mid-cap companies, it will be subject to additional risks because the operating histories of these companies tend to be more limited, their earnings and revenues less predictable (and some companies may be experiencing significant losses), and

their share prices more volatile than those of larger, more established companies. The shares of smaller companies tend to trade less frequently than those of larger, more established companies, which can adversely affect the pricing of these securities and the fund's ability to sell these securities. Smaller companies may have limited product lines, markets or financial resources, or may depend on a limited management group. Some of the fund's investments will rise and fall based on investor perception rather than economic factors. Investments may be made in anticipation of future products, services or events whose delay or cancellation could cause the stock price to drop.

- *Foreign investment risk.* Because the fund invests in foreign securities, the fund's performance will be influenced by political, social and economic factors affecting investments in foreign issuers. Special risks associated with investments in foreign issuers include exposure to currency fluctuations, less liquidity, less developed or less efficient trading markets, lack of comprehensive company information, political and economic instability and differing auditing and legal standards. The imposition of sanctions, confiscations, trade restrictions (including tariffs) and other government restrictions by the United States and other governments, or problems related to share registration, trade settlement, or asset custody, may result in losses for the fund. Investments denominated in foreign currencies are subject to the risk that such currencies will decline in value relative to the U.S. dollar and affect the value of these investments held by the fund. To the extent securities held by the fund trade in a market that is closed when the exchange on which the fund's shares trade is open, there may be deviations between the current price of a security and the last quoted price for the security in the closed foreign market. These deviations could result in the fund experiencing premiums or discounts greater than those of ETFs that invest in domestic securities. To the extent the fund's investments are focused in a limited number of foreign countries, the fund's performance could be more volatile than that of more geographically diversified funds.
- *Market risk.* The value of the securities in which the fund invests may be affected by political, regulatory, economic and social developments, and developments that impact specific economic sectors, industries or segments of the market. In addition, turbulence in financial markets and reduced liquidity in equity, credit and/or fixed income markets may negatively affect many issuers, which could adversely affect the fund. Global economies and financial markets are becoming increasingly interconnected, and conditions and events in one country, region or financial market may adversely impact issuers in a different country, region or financial market. These risks may be magnified if certain events or developments adversely interrupt the global supply chain; in these and other circumstances, such risks might affect companies world-wide. A widespread outbreak of an infectious illness, such as COVID-19, and efforts to contain its spread, may result in market volatility, inflation, reduced liquidity of certain instruments, disruption in the trading of certain instruments, and systemic economic weakness. To the extent the fund may overweight its investments in certain companies, industries or market sectors, such positions will increase the fund's exposure to risk of loss from adverse developments affecting those countries, companies, industries or sectors.
- *Management risk.* The investment process and techniques used by the fund's sub-adviser could fail to achieve the fund's investment goal, may cause your fund investment to lose value or may cause the fund to underperform other funds with similar investment goals.
- *European risk.* To the extent the fund invests significantly in the securities of issuers located in the European region, the fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests. Any adverse economic or political events in Europe may cause the fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. Countries in Europe will be significantly affected by the fiscal and monetary controls of the Economic and Monetary Union of the European Union (EU). Changes in regulations on trade, decreasing imports or exports, changes in the exchange rate of the Euro, the default or threat of default by an EU member country on its sovereign debt, and recessions among European countries may have a significant adverse effect on the economies of other European countries. In addition, one or more countries may abandon the Euro and/or withdraw from the EU, such as the United Kingdom's (the "U.K.'s") formal exit on January 31, 2020, which could potentially have an adverse effect on the value of the fund's investments. There is still considerable uncertainty relating to the potential consequences associated with the U.K.'s exit and whether the exit will increase the likelihood of other countries also departing the EU.
- *France risk.* To the extent the fund invests a significant portion of its assets in securities of French issuers, the fund will be subject to risks that are specific to France, including certain legal, regulatory, political, economic, currency and security risks. Recently, concerns have emerged in relation to the economic health of the EU. These concerns have led to downward pressure the economies of certain EU member states, including France. Interest rates on France's debt may rise to levels that make it difficult for it to service high debt levels without significant financial help from, among others, the European Central Bank and could potentially result in default. In addition, the French economy is dependent to a significant extent on the economies of certain key trading partners, including Germany and other Western European countries. Reduction in spending on French products and services, or changes in any of the economies may cause an adverse impact on the French economy. In addition, France has been subject to acts of

terrorism which has been detrimental to tourism. The French economy is dependent on exports from the agricultural sector. Leading agricultural exports include dairy products, meat, wine, fruit and vegetables, and fish. As a result, the French economy is susceptible to fluctuations in demand for agricultural products.

- *Emerging market risk.* The securities of issuers located or doing substantial business in emerging market countries tend to be more volatile and less liquid than the securities of issuers located in countries with more mature economies, potentially making prompt liquidation at an attractive price difficult. The economies of countries with emerging markets may be based predominantly on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme debt burdens or volatile inflation rates. There may be less information publicly available about an emerging market issuer than about a developed market issuer and/or the available information may be outdated or unreliable. In addition, emerging market issuers may not be subject to accounting, auditing, legal and financial reporting standards comparable to those in developed markets, potentially making it difficult to evaluate such issuers. Transaction settlement and dividend collection procedures also may be less reliable in emerging markets than in developed markets. Emerging markets generally have less diverse and less mature economic structures and less stable political systems than those of developed countries. Additionally, investments in these countries may have restrictions that make it difficult or impossible for the fund to exercise rights, pursue legal remedies, and obtain judgements in foreign courts. Investments in these countries may be subject to political, economic, legal, market and currency risks. The risks may include less protection of property rights and uncertain political and economic policies, greater vulnerability to market manipulation, the imposition of capital controls and/or foreign investment limitations by a country, nationalization of businesses and the imposition of sanctions by other countries, such as the United States.
- *Issuer risk.* A security's market value may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's products or services, or factors that affect the issuer's industry, such as labor shortages or increased production costs and competitive conditions within an industry.
- *Authorized participants, market makers and liquidity providers risk.* The fund has a limited number of financial institutions that may act as Authorized Participants, which are responsible for the creation and redemption activity for the fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, fund shares may trade at a material discount to net asset value and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Fluctuation of net asset value, share premiums and discounts risk.* The net asset value of fund shares will generally fluctuate with changes in the market value of the fund's securities holdings. The market prices of fund shares will generally fluctuate in accordance with changes in the fund's net asset value and supply and demand of fund shares on the exchange. It cannot be predicted whether fund shares will trade below, at or above their net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for fund shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the underlying portfolio trading individually or in the aggregate at any point in time. The market prices of fund shares may deviate significantly from the net asset value of fund shares during periods of market volatility. However, given that fund shares can be created and redeemed in Creation Units (unlike shares of many closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Adviser believes that large discounts or premiums to the net asset value of fund shares should not be sustained over long periods. While the creation/redemption feature is designed to make it likely that fund shares normally will trade close to the fund's net asset value, disruptions to creations and redemptions or market volatility may result in trading prices that differ significantly from the fund's net asset value. If an investor purchases fund shares at a time when the market price is at a premium to the net asset value of fund shares or sells at a time when the market price is at a discount to the net asset value of fund shares, then the investor may sustain losses.
- *Trading issues risk.* Although fund shares are listed for trading on an exchange and may be listed or traded on other U.S. and non-U.S. stock exchanges as well, there can be no assurance that an active trading market for such fund shares will develop or be maintained. Trading in fund shares may be halted due to market conditions or for reasons that, in the view of the listing exchange, make trading in fund shares inadvisable. In addition, trading in fund shares on an exchange is subject to trading halts caused by extraordinary market volatility pursuant to exchange "circuit breaker" rules. Similar to the shares of operating companies listed on a stock exchange, fund shares may be sold short and are therefore subject to the risk of increased volatility in the trading price of the fund's shares. While the fund expects that the ability of Authorized Participants to create and redeem fund shares at net asset value should be effective in reducing any such volatility, there is no guarantee that it will eliminate the volatility associated with such

short sales. There can be no assurance that the requirements of the listing exchange necessary to maintain the listing of the fund will continue to be met or will remain unchanged or that fund shares will trade with any volume, or at all, on any stock exchange.

- *Limited operating history risk.* The fund is recently organized with limited operating history. The fund has limited performance history for investors to evaluate and may not attract sufficient assets to achieve investment and trading efficiencies. There can be no assurance that the fund will grow to or maintain an economically viable size, in which case the board of trustees may determine to liquidate the fund, which can be initiated without shareholder approval if the board determines it is in the best interest of shareholders. As a result, the timing of the fund's liquidation may not be favorable to certain individual shareholders.
- *Non-diversification risk.* The fund is non-diversified, which means that the fund may invest a relatively high percentage of its assets in a limited number of issuers. Therefore, the fund's performance may be more vulnerable to changes in the market value of a single issuer or group of issuers and more susceptible to risks associated with a single economic, political or regulatory occurrence than a diversified fund.

In addition to the principal risks described above, the fund is subject to the following additional risks that are not anticipated to be principal risks of investing in the fund:

- *Cash transaction risk.* To the extent the fund sells portfolio securities to meet some or all of a redemption request with cash, the fund may incur taxable gains or losses that it might not have incurred had it made redemptions entirely in kind. As a result, the fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used. Additionally, the fund may incur additional brokerage costs related to buying and selling securities if it utilizes cash as part of a creation or redemption transaction than it would if the fund had transacted entirely in-kind. The fund imposes transaction fees to offset all or a part of the costs associated with utilizing cash as part of a creation or redemption transaction. To the extent that the transaction fees do not offset the costs associated with a cash transaction, the fund's performance may be negatively impacted.
- *Depository receipt risk.* Depository receipts, such as American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs), may be subject to certain of the risks associated with direct investments in the securities of foreign companies, such as currency risk, political and economic risk and market risk, because their values depend on the performance of the non-dollar denominated underlying foreign securities. Certain countries may limit the ability to convert depository receipts into the underlying foreign securities and vice versa, which may cause the securities of the foreign company to trade at a discount or premium to the market price of the related depository receipt. The fund may invest in depository receipts through an unsponsored facility where the depository issues the depository receipts without an agreement with the company that issues the underlying securities. Holders of unsponsored depository receipts generally bear all the costs of such facilities, and the depository of an unsponsored facility frequently is under no obligation to distribute shareholder communications received from the issuer of the deposited security or to pass through voting rights to the holders of the depository receipts with respect to the deposited securities. As a result, available information concerning the issuer may not be as current as for sponsored depository receipts, and the prices of unsponsored depository receipts may be more volatile than if such instruments were sponsored by the issuer.
- *ETF and other investment company risk.* To the extent the fund invests in pooled investment vehicles, such as ETFs and other investment companies, the fund will be affected by the investment policies, practices and performance of such entities in direct proportion to the amount of assets the fund has invested therein. The risks of investing in other investment companies, including ETFs, typically reflect the risks associated with the types of instruments in which the investment companies invest. When the fund invests in an ETF or other investment company, shareholders of the fund will bear indirectly their proportionate share of the expenses of the ETF or other investment company (including management fees) in addition to the expenses of the fund. ETFs are exchange-traded investment companies that are, in many but not all cases, designed to provide investment results corresponding to an index. The value of the underlying securities can fluctuate in response to activities of individual companies or in response to general market and/or economic conditions. Additional risks of investments in ETFs include: (i) the market price of an ETF's shares may trade at a discount to its net asset value; (ii) an active trading market for an ETF's shares may not develop or be maintained; or (iii) trading may be halted if the listing exchanges' officials deem such action appropriate, the shares are delisted from the exchange, or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts trading generally. The fund will incur brokerage costs when purchasing and selling shares of ETFs.
- *Costs of buying and selling shares risk.* Investors buying or selling fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for fund shares (the "bid" price) and the price at which an investor is willing to sell fund shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread."

The bid/ask spread varies over time for fund shares based on trading volume and market liquidity, and is generally lower if fund shares have more trading volume and market liquidity and higher if fund shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling fund shares, including bid/ask spreads, frequent trading of fund shares may significantly reduce investment results and an investment in fund shares may not be advisable for investors who anticipate regularly making small investments.

- *Liquidity risk.* When there is little or no active trading market for specific types of securities, it can become more difficult to sell the securities in a timely manner at or near their perceived value. In such a market, the value of such securities and the fund's share price may fall dramatically, even during periods of declining interest rates. Investments that are illiquid or that trade in lower volumes may be more difficult to value. Investments in foreign securities, particularly those of issuers located in emerging markets, tend to have greater exposure to liquidity risk than domestic securities. Liquidity can also decline unpredictably in response to overall economic conditions or credit tightening. In addition, in stressed market conditions the market for the fund's shares may become less liquid in response to deteriorating liquidity with respect to the fund's portfolio securities, which could lead to differences between the market price of the fund's shares and the net asset value of the fund's shares.
- *Securities lending risk.* The fund may lend its portfolio securities to brokers, dealers and other financial institutions. In connection with such loans, the fund will receive collateral from the borrower equal to at least 100% of the value of the loaned securities. If the borrower of the securities fails financially, there could be delays in recovering the loaned securities or exercising rights to the collateral.
- *Portfolio turnover risk.* The fund may engage in short-term trading which could produce higher transaction costs and taxable distributions, and lower the fund's after-tax performance.
- *Temporary investment risk.* Under adverse market conditions, the fund could invest some or all of its assets in U.S. Treasury securities and/or money market securities, or hold cash. Although the fund would do this for temporary defensive purposes, it could reduce the benefit from any upswing in the market. During such periods, the fund's investments may not be consistent with its principal investment strategy, and the fund may not achieve its investment objective.

Management

Investment Adviser

The investment adviser for the fund is BNY Mellon ETF Investment Adviser, LLC, located at 201 Washington Street, Boston, Massachusetts 02108. The Adviser serves as investment adviser to thirteen funds, and as of December 31, 2023, oversees approximately \$5.5 billion in assets. For the fiscal period ended October 31, 2023, the fund paid the Adviser a management fee at an annual rate of 0.65% of the value of the fund's average daily net assets.

The fund's management agreement provides that the Adviser will pay substantially all expenses of the fund, except for the management fees, payments under the fund's 12b-1 plan (if any), interest expenses, taxes, acquired fund fees and expenses, brokerage commissions, costs of holding shareholder meetings, fees and expenses associated with any securities lending program to be adopted by the fund, and litigation and potential litigation and other extraordinary expenses not incurred in the ordinary course of the fund's business.

The Adviser may from time to time voluntarily waive and/or reimburse fees or expenses in order to limit total annual fund operating expenses. Any such voluntary waiver or reimbursement may be eliminated by the Adviser at any time.

The Adviser is an investment adviser registered with the SEC as such pursuant to the Investment Advisers Act of 1940. The Adviser is the primary ETF business, and a wholly-owned subsidiary, of BNY Mellon, a global investments company dedicated to helping its clients manage and service their financial assets throughout the investment lifecycle. Whether providing financial services for institutions, corporations or individual investors, BNY Mellon delivers informed investment management and investment services in 35 countries. BNY Mellon is a leading investment management and investment services company, uniquely focused to help clients manage and move their financial assets in the rapidly changing global marketplace. As of December 31, 2023, BNY Mellon had \$47.8 trillion in assets under custody and administration and \$2.0 trillion in assets under management. "BNY Mellon" is the corporate brand of The Bank of New York Mellon Corporation. BNY Mellon Investment Management is one of the world's leading investment management organizations, and one of the top U.S. wealth managers, encompassing BNY Mellon's affiliated investment management firms, wealth management services and global distribution companies. Additional information is available at www.im.bnymellon.com.

The asset management philosophy of the Adviser is based on the belief that discipline and consistency are important to investment success. For each fund in the trust, the Adviser seeks to establish clear guidelines for portfolio management and to be systematic in making decisions. This approach is designed to provide each fund with a distinct, stable identity.

Sub-Adviser

The Adviser has engaged its affiliate, Newton Investment Management North America LLC (NIMNA), located at 201 Washington Street, Boston, MA 02108, to serve as the fund's sub-adviser. NIMNA is a wholly owned subsidiary of BNY Mellon. As of December 31, 2023, NIMNA had approximately \$59.9 billion in assets under management. NIMNA, subject to the Adviser's supervision and approval, provides investment advisory assistance and research and the day-to-day management of the fund's investments.

A discussion regarding the basis for the board's approval of the fund's advisory agreement with the Adviser, and the sub-investment advisory agreement between the Adviser and NIMNA on behalf of the fund, is available in the fund's semi-annual report for the period ended April 30, 2023.

NIMNA has entered into a sub-sub-investment advisory agreement with its affiliate, Newton Investment Management Limited (NIM), to enable NIM to provide certain advisory services to NIMNA for the benefit of the fund, including, but not limited to, portfolio management services. NIM is subject to the supervision of NIMNA and the Adviser. NIM is also an affiliate of BNYM Investment Adviser. NIM, located at 160 Queen Victoria Street, London, EC4V 4LA, England, was formed in 1978 and, as of December 31, 2023, had approximately \$45.8 billion in assets under management. NIM is an indirect subsidiary of BNY Mellon regulated by the Financial Conduct Authority in the United Kingdom and registered in the United States with the Securities and Exchange Commission as an investment adviser. A discussion regarding the basis for the board's approving the sub-sub-investment advisory agreement between NIMNA and NIM is available in the fund's annual report for the year ended October 31, 2023.

The Adviser has obtained from the SEC an exemptive order, upon which the fund may rely, to use a manager of managers approach that permits the Adviser, subject to certain conditions and approval by the fund's board, to enter into and materially amend sub-investment advisory agreements with one or more sub-advisers who are either unaffiliated or affiliated with the Adviser without obtaining shareholder approval. The exemptive order also relieves the fund from disclosing the sub-investment advisory fee paid by the Adviser to a sub-adviser in documents filed with the SEC and provided to shareholders. The fund is required to disclose (as a dollar amount and a percentage of the fund's assets) (1) the aggregate fees paid to the Adviser and any wholly-owned sub-adviser and (2) the aggregate fees paid to affiliated (i.e.,

less than wholly-owned) and unaffiliated sub-advisers. The Adviser has ultimate responsibility (subject to oversight by the fund's board) to supervise any sub-adviser and recommend the hiring, termination, and replacement of any sub-adviser to the fund's board. The fund's board, including a majority of the "non-interested" board members, must approve each new sub-adviser. In addition, the fund is required to provide shareholders with information about each new sub-adviser within 90 days of the hiring of any new sub-adviser.

Portfolio Managers

James A. Lydotes, CFA and Brock Campbell, CFA are the fund's primary portfolio managers. Mr. Lydotes has been the lead primary portfolio manager and Mr. Campbell has been a primary portfolio manager of the fund since its inception in November, 2022. Mr. Lydotes is deputy chief investment officer of equity at NIMNA. Mr. Campbell is the head of global equity research at NIMNA. Messrs. Lydotes and Campbell have been employed by NIMNA or a predecessor company since 2005. Messrs. Lydotes and Campbell are jointly and primarily responsible for the day-to-day management of the fund's portfolio.

The fund's Statement of Additional Information (SAI) provides additional portfolio manager information, including compensation, other accounts managed and ownership of fund shares.

Code of Ethics

The fund, the Adviser, NIMNA, NIM and BNY Mellon Securities Corporation (BNYMSC) have each adopted a code of ethics that permits its personnel, subject to such code, to invest in securities, including securities that may be purchased or held by the fund. Each code of ethics restricts the personal securities transactions of employees, and requires portfolio managers and other investment personnel to comply with the code's preclearance and disclosure procedures. The primary purpose of the respective codes is to ensure that personal trading by employees is done in a manner that does not disadvantage the fund or other client accounts.

Distributor and Distribution and Service Plan

BNYMSC, a wholly-owned subsidiary of the BNY Mellon, serves as the fund's distributor. BNYMSC does not distribute fund shares in less than creation units, nor does it maintain a secondary market in fund shares. BNYMSC may enter into selected agreements with other broker-dealers or other qualified financial institutions for the sale of creation units of fund shares. BNYMSC also serves as distributor for other affiliated mutual funds.

The board of trustees of the trust has adopted a distribution and service plan (Plan) pursuant to Rule 12b-1 under the 1940 Act for the fund.

Under the Plan, the fund is authorized to pay fees in connection with the sale and distribution of its shares in an amount up to 0.25% of the fund's average daily net assets each year. No payments pursuant to the Plan will be made through at least the next twelve (12) months of operation. Additionally, the implementation of any such payments would have to be approved by the board prior to implementation. Because these fees would be paid out of the fund's assets on an ongoing basis, if payments are made in the future, these fees will increase the cost of your investment and will cost you more over time.

Additional Information

Additional Purchase and Sale Information

Fund shares are listed for secondary trading on the Cboe BZX Exchange, Inc. (Cboe) and individual fund shares may only be purchased and sold in the secondary market through a broker-dealer. The secondary markets are closed on weekends and also are generally closed on the following holidays: New Year's Day, Dr. Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day (observed), Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. An exchange may close early on the business day before certain holidays and on the day after Thanksgiving Day. Exchange holiday schedules are subject to change without notice. If you buy or sell fund shares in the secondary market, you will pay the secondary market price for fund shares. In addition, you may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

The trading prices of fund shares will fluctuate continuously throughout trading hours based on market supply and demand rather than the fund's net asset value, which is calculated at the end of each business day (normally 4:00 p.m. Eastern time). Fund shares will trade on an exchange at market prices that may be above (i.e., at a premium) or below (i.e., at a discount), to varying degrees, the daily net asset value of fund shares. The trading prices of fund shares may deviate significantly from the fund's net asset value during periods of market volatility. Given, however, that fund shares can be issued and redeemed daily in Creation Units, the Adviser believes that large discounts and premiums to net asset value should not be sustained over long periods. Each business day, the following information is available at www.im.bnymellon.com with respect to the fund: (i) information for each portfolio holding that will form the basis of the next calculation of the fund's net asset value per fund share; (ii) the fund's net asset value per fund share, market price, and premium or discount, each as of the end of the prior business day; (iii) a table showing the number of days the fund's shares traded at a premium or discount during the most recently completed calendar year and the most recently completed calendar quarter since that year; (iv) a line graph showing fund share premiums or discounts for the most recently completed calendar year and the most recently completed quarter since that year; (v) the fund's median bid-ask spread over the last thirty calendar days; and (vi) if during the past year the fund's premium or discount was greater than 2% for more than seven consecutive trading days, a statement that the fund's premium or discount, as applicable, was greater than 2% and a discussion of the factors that are reasonably believed to have materially contributed to the premium or discount.

Cboe will disseminate, every fifteen seconds during the regular trading day, an indicative optimized portfolio value (IOPV) relating to the fund. The IOPV calculations are estimates of the value of the fund's net asset value per fund share. Premiums and discounts between the IOPV and the market price may occur. This should not be viewed as a "real-time" update of the net asset value per fund share. The IOPV is based on the current market value of the published basket of portfolio securities and/or cash required to be deposited in exchange for a Creation Unit and does not necessarily reflect the precise composition of the fund's actual portfolio at a particular point in time. Moreover, the IOPV is generally determined by using current market quotations and/or price quotations obtained from broker-dealers and other market intermediaries and valuations based on current market rates. The IOPV may not be calculated in the same manner as the net asset value, which (i) is computed only once a day, (ii) unlike the calculation of the IOPV, takes into account fund expenses, and (iii) may be subject, in accordance with the requirements of the 1940 Act, to fair valuation at different prices than those used in the calculations of the IOPV. The IOPV price is based on quotes and closing prices from the securities' local market converted into U.S. dollars at the current currency rates and may not reflect events that occur subsequent to the local market's close. Therefore, the IOPV may not reflect the best possible valuation of the fund's current portfolio. Neither the fund nor the Adviser or any of their affiliates are involved in, or responsible for, the calculation or dissemination of such IOPVs and make no warranty as to their accuracy.

The fund does not impose any restrictions on the frequency of purchases and redemptions; however, the fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the board evaluated the risks posed by market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of the fund's investment strategy, or whether they would cause the fund to experience increased transaction costs. The board considered that, unlike traditional mutual funds, fund shares are issued and redeemed only in large quantities of shares known as Creation Units, available only from the fund directly, and that most trading in the fund occurs on exchanges at prevailing market prices and does not involve the fund directly. Given this structure, the board determined that it is unlikely that (a) market timing would be attempted by the fund's shareholders or (b) any attempts to market time the fund by shareholders would result in negative impact to the fund or its shareholders.

Portfolio Holdings Disclosure

The fund's portfolio holdings disclosure policy is described in the SAI. In addition, the identities and quantities of the securities held by the fund are disclosed on the fund's website, www.im.bnymellon.com.

Distributions

Each fund shareholder is entitled to the shareholder's pro rata share of the fund's income and net realized gains on the fund's investments. The fund pays out substantially all of its net earnings to its shareholders as "distributions."

The fund may earn income dividends from stocks, interest from debt securities and, if participating, securities lending income. These amounts, net of expenses and taxes (if applicable), are passed along to fund shareholders as "income dividend distributions." The fund will generally realize short-term capital gains or losses whenever it sells or exchanges assets held for one year or less. Net short-term capital gains will generally be treated as ordinary income when distributed to shareholders. The fund will generally realize long-term capital gains or losses whenever it sells or exchanges assets held for more than one year. Net capital gains (the excess of the fund's net long-term capital gains over its net short-term capital losses) are distributed to shareholders as "capital gain distributions." While the fund does not intend to make distributions that would be treated as return of capital to shareholders, the fund's investment in REITs may require the fund to pay out estimated distributions that could constitute a return of capital to fund shareholders. Any return of capital to shareholders will be distributed after payment of fund fees and expenses, and should not be considered dividend income or total return of an investment in fund shares.

Income dividend distributions, if any, for the fund are generally distributed to shareholders quarterly, but may vary significantly from period to period. Net capital gains for the fund are distributed at least annually. Dividends may be declared and paid more frequently or at any other time to comply with the distribution requirements of the Internal Revenue Code of 1986, as amended (the "Code").

If you buy shares of the fund when the fund has realized but not yet distributed income or capital gains, you will be "buying a dividend" by paying the full price for the shares and then receiving a portion back in the form of a taxable distribution.

Distributions in cash may be reinvested automatically in additional whole fund shares only if the broker through whom you purchased fund shares makes such option available. Distributions which are reinvested will nevertheless be taxable to the same extent as if such distributions had not been reinvested (unless you are investing through an IRA, retirement plan or other U.S. tax-advantaged investment plan).

Additional Tax Information

The following discussion is a summary of certain important U.S. federal income tax considerations generally applicable to an investment in the fund. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the fund, or the tax consequences of an investment in the fund. An investment in the fund may have other tax implications. Please consult a tax advisor about the applicable federal, state, local, foreign or other tax laws. Investors, including non-U.S. investors, may wish to consult the SAI tax section for additional disclosure.

Tax Status of the Fund. The fund intends to elect and intends to qualify for the special tax treatment afforded a regulated investment company ("RIC") under the Code. If the fund meets certain minimum distribution requirements, as a RIC it is not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, if the fund fails to qualify as a RIC or to meet minimum distribution requirements, it would result in fund-level taxation if certain relief provisions were not available, and consequently a reduction in income available for distribution to shareholders. Unless you are a tax-exempt entity or your investment in the fund's shares is made through a tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when the fund makes distributions, you sell fund shares and you purchase or redeem Creation Units (Authorized Participants only).

Taxes on Distributions.

In general, distributions are subject to federal income tax when they are paid, whether the distributions are taken in cash or reinvested in the fund. The income dividends and short-term capital gains distributions received from the fund will be taxed as either ordinary income or qualified dividend income. Distributions from the fund's short-term capital gains are generally taxable as ordinary income. Subject to certain limitations, dividends that are reported by the fund as qualified dividend income are taxable to non-corporate shareholders at rates of up to 20%. Any distributions of the fund's net capital gains are taxable as long-term capital gain regardless of how long fund shares have been owned by an investor. Long-term capital gains are generally taxed to non-corporate shareholders at rates of up to 20%. Distributions

in excess of the fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of the investor's basis in the fund's shares, and, in general, as capital gain thereafter.

In general, dividends may be reported by the fund as qualified dividend income if they are attributable to qualified dividend income received by the fund, which, in general, includes dividend income from taxable U.S. corporations and certain foreign corporations (i.e., certain foreign corporations incorporated in a possession of the United States or in certain countries with a comprehensive tax treaty with the United States, and certain other foreign corporations if the stock with respect to which the dividend is paid is readily tradable on an established securities market in the United States), provided that the fund satisfies certain holding period requirements in respect of the stock of such corporations and has not hedged its position in the stock in certain ways. A dividend generally will not be treated as qualified dividend income if the dividend is received with respect to any share of stock held by the fund for fewer than 61 days during the 121-day period beginning at the date which is 60 days before the date on which such share becomes ex-dividend with respect to such dividend. These holding period requirements will also apply to investor ownership of fund shares. Holding periods may be suspended for these purposes for stock that is hedged. It is expected that dividends received by the fund from a REIT and distributed from the fund to a shareholder generally will not be treated as qualified dividend income. Additionally, income derived in connection with the fund's securities lending activities will not be treated as qualified dividend income.

U.S. individuals with income exceeding specified thresholds are subject to a 3.8% tax on all or a portion of their "net investment income," which includes taxable interest, dividends and certain capital gains (generally including capital gain distributions and capital gains realized upon the sale of fund shares). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the fund that are attributable to dividends received by the fund from U.S. corporations, subject to certain limitations. The fund's investment strategies may significantly limit its ability to distribute dividends eligible for the dividends-received deduction for corporations.

If an investor lends fund shares pursuant to securities lending arrangements, the investor may lose the ability to treat fund dividends (paid while the fund shares are held by the borrower) as qualified dividend income. Please consult a financial intermediary or tax advisor to discuss the particular circumstances.

In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January, but declared by the fund in October, November or December of the previous year, payable to shareholders of record in such a month, may be taxable to an investor in the calendar year in which they were declared.

A distribution will reduce the fund's net asset value per fund share and may be taxable to a shareholder as ordinary income or capital gain even though, from an investment standpoint, the distribution may constitute a return of capital. You should note that if you purchase shares of the fund just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and generally should be avoided by taxable investors.

The fund (or your broker) will inform you of the amount of your ordinary income dividends, qualified dividend income, and net capital gain distributions shortly after the close of each calendar year.

Foreign Currency Transactions. The fund's transactions in foreign currencies may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned. *Foreign Income Taxes.* Investment income received by the fund from sources within foreign countries may be subject to foreign income taxes withheld at the source. The United States has entered into tax treaties with many foreign countries which may entitle the fund to a reduced rate of such taxes or exemption from taxes on such income. It is impossible to determine the effective rate of foreign tax for the fund in advance since the amount of the assets to be invested within various countries is not known. If more than 50% of the total assets of the fund at the close of its taxable year consist of certain foreign stocks or securities, the fund may elect to "pass through" to shareholders certain foreign income taxes (including withholding taxes) paid by the fund. If the fund makes such an election, the shareholder will be considered to have received as an additional dividend the shareholder's share of such foreign taxes, but the shareholder may be entitled to either a corresponding tax deduction in calculating the shareholder's taxable income, or, subject to certain limitations, a credit in calculating the shareholder's federal income tax. No deduction for such taxes will be permitted to individuals in computing their alternative minimum tax liability. If the fund does not so elect, the fund will be entitled to claim a deduction for certain foreign taxes incurred by the fund. Under certain circumstances, if the fund receives a refund of foreign taxes paid in respect of a prior year, the value of fund shares could be reduced or any foreign tax credits or deductions passed through to shareholders in respect of the fund's foreign taxes for the current year could be reduced.

Investments in Certain Foreign Corporations. The fund may invest in foreign entities classified as passive foreign investment companies or "PFICs" or controlled foreign corporations or "CFCs" under the Code. PFIC and CFC investments are subject to complex rules that may under certain circumstances adversely affect the fund. Accordingly, investors should consult their own tax advisors and carefully consider the tax consequences of PFIC and CFC investments by the fund before making an investment in the fund. Fund dividends attributable to dividends received from PFICs and CFCs generally will not be treated as qualified dividend income. Additional information pertaining to the potential tax consequences to the fund, and to the shareholders, from the fund's potential investment in PFICs and CFCs can be found in the SAI.

Taxation of REIT Investments. The fund may invest in U.S. REITs. "Qualified REIT dividends" (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) are eligible for a 20% deduction by non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). Pursuant to proposed Treasury regulations on which the fund may rely, distributions by the fund to its shareholders that are attributable to qualified REIT dividends received by the fund and which the fund properly reports as "section 199A dividends," are treated as "qualified REIT dividends" in the hands of non-corporate shareholders. A section 199A dividend is treated as a qualified REIT dividend only if the shareholder receiving such dividend holds the dividend-paying RIC shares for at least 46 days of the 91-day period beginning 45 days before the shares become ex-dividend and is not under an obligation to make related payments with respect to a position in substantially similar or related property. The fund is permitted to report such part of its dividends as section 199A dividends as are eligible but is not required to do so. Unless later extended or made permanent, this 20% deduction will no longer be available for taxable years beginning after December 31, 2025.

REITs in which the fund invests often do not provide complete and final tax information to the fund until after the time that the fund issues a tax reporting statement. As a result, the fund may at times find it necessary to reclassify the amount and character of its distributions to you after it issues your tax reporting statement. When such reclassification is necessary, the fund (or a financial intermediary, such as a broker, through which a shareholder owns shares) will send you a corrected, final Form 1099-DIV to reflect the reclassified information. If you receive a corrected Form 1099-DIV, use the information on this corrected form, and not the information on the previously issued tax reporting statement, in completing your tax returns.

Investments in REIT equity securities may require the fund to accrue and distribute income not yet received. To generate sufficient cash to make the requisite distributions, the fund may be required to sell securities in its portfolio (including when it is not advantageous to do so) that it otherwise would have continued to hold. The fund's investments in REIT equity securities may at other times result in the fund's receipt of cash in excess of the REIT's earnings; if the fund distributes these amounts, these distributions could constitute a return of capital to the fund's shareholders for federal income tax purposes. Dividends paid by a REIT, other than capital gain distributions, will generally be taxable as ordinary income up to the amount of the REIT's current and accumulated earnings and profits. Capital gain dividends paid by a REIT to the fund will be treated as long-term capital gains by the fund and, in turn, may be distributed by the fund to shareholders as a capital gain distribution. Dividends received by the fund from a REIT generally will not constitute qualified dividend income or qualify for the dividends received deduction. If a REIT is operated in a manner such that it fails to qualify as a REIT, an investment in the REIT would become subject to double taxation, meaning the taxable income of the REIT would be subject to federal income tax at the regular corporate rate without any deduction for dividends paid to shareholders and the dividends would be taxable to shareholders as ordinary income (or possibly as qualified dividend income) to the extent of the REIT's current and accumulated earnings and profits.

Taxes on Share Sales. Each sale of shares of the fund will generally be a taxable event. Assuming a shareholder holds shares of the fund as capital assets, any capital gain or loss realized upon a sale of fund shares is generally treated as long-term capital gain or loss if fund shares have been held for more than one year and as short-term capital gain or loss if fund shares have been held for one year or less, except that any capital loss on the sale of fund shares held for six months or less is treated as long-term capital loss to the extent that capital gain dividends were paid with respect to such fund shares. Any loss realized on a sale will be disallowed to the extent shares of the fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of such shares. The ability to deduct capital losses may be limited.

Taxes on Creations and Redemptions of Creation Units. An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or loss. The gain or loss will be equal to the difference between the market value of the Creation Units at the time and the exchanger's aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the aggregate market value of the securities and the amount of cash received. The Internal Revenue Service (IRS), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing "wash sales"

(for an Authorized Participant who does not mark-to-market its holdings), or on the basis that there has been no significant change in economic position. Authorized Participants exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

When creating or redeeming Creation Units, a confirmation statement will be sent showing the number of fund shares purchased or sold with the applicable share price.

The trust, on behalf of the fund, has the right to reject an order for Creation Units if the purchaser (or a group of purchasers) would, upon obtaining the fund shares so ordered, own 80% or more of the outstanding shares of the fund and if, pursuant to Section 351 of the Code, the fund would have a basis in the securities different from the market value of the securities on the date of deposit. The trust also has the right to require information necessary to determine beneficial share ownership for purposes of the 80% determination. If the trust does issue Creation Units to a purchaser (or a group of purchasers) that would, upon obtaining the fund shares so ordered, own 80% or more of the outstanding shares of the fund, the purchaser (or group of purchasers) will not recognize gain or loss upon the exchange of securities for Creation Units.

If the fund redeems Creation Units in cash in addition to, or in place of, the delivery of a basket of securities, it may bear additional costs and recognize more capital gains than it would if it redeems Creation Units in-kind.

Certain Tax-Exempt Investors. The fund, if investing in certain limited real estate investments, may be required to pass through certain "excess inclusion income" and other income as "unrelated business taxable income" (UBTI). Prior to investing in the fund, tax-exempt investors sensitive to UBTI should consult their tax advisors regarding this issue and IRS pronouncements addressing the treatment of such income in the hands of such investors. Certain tax-exempt educational institutions will be subject to a 1.4% tax on net investment income. For these purposes, certain dividends and capital gain distributions, and certain gains from the disposition of fund shares (among other categories of income), are generally taken into account in computing a shareholder's net investment income.

Non-U.S. Investors. Ordinary income dividends paid by the fund to shareholders who are non-resident aliens or foreign entities will generally be subject to a 30% U.S. withholding tax (other than distributions reported by the fund as interest-related dividends and short-term capital gain dividends), unless a lower treaty rate applies or unless such income is effectively connected with a U.S. trade or business. In general, the fund may report interest-related dividends to the extent of its net income derived from U.S.-source interest, and the fund may report short-term capital gain dividends to the extent its net short-term capital gain for the taxable year exceeds its net long-term capital loss. Gains on the sale of fund shares and dividends that are, in each case, effectively connected with the conduct of a trade or business within the U.S. will generally be subject to U.S. federal net income taxation at regular income tax rates.

Unless certain non-U.S. entities that hold fund shares comply with IRS requirements that will generally require them to report information regarding U.S. persons investing in, or holding accounts with, such entities, a 30% withholding tax may apply to distributions payable to such entities. A non-U.S. shareholder may be exempt from the withholding described in this paragraph under an applicable intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement.

Backup Withholding. The fund will be required in certain cases to withhold (as "backup withholding") on amounts payable to any shareholder who (1) has provided the fund either an incorrect tax identification number or no number at all, (2) is subject to backup withholding by the IRS for failure to properly report payments of interest or dividends, (3) has failed to certify to the fund that such shareholder is not subject to backup withholding, or (4) has not certified that such shareholder is a U.S. person (including a U.S. resident alien). The backup withholding rate is currently 24%. Backup withholding will not be applied to payments that have been subject to the 30% withholding tax on shareholders who are neither citizens nor permanent residents of the United States.

Certain Potential Tax Reporting Requirements. Under U.S. Treasury regulations, if a shareholder recognizes a loss of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on Form 8886. Direct shareholders of portfolio securities are in many cases excepted from this reporting requirement, but under current guidance shareholders of a RIC are not excepted. Significant penalties may be imposed for the failure to comply with the reporting requirements. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer's treatment of the loss is proper. Shareholders should consult their tax advisors to determine the applicability of these regulations in light of their individual circumstances.

Other Tax Issues. The fund may be subject to tax in certain states where the fund does business (or is treated as doing business as a result of its investments). Furthermore, in those states which have income tax laws, the tax treatment of the fund and of fund shareholders with respect to distributions by the fund may differ from federal tax treatment.

The foregoing discussion summarizes some of the consequences under current federal income tax law of an investment in the fund. It is not a substitute for personal tax advice. Consult a personal tax advisor about the potential tax consequences of an investment in the fund under all applicable tax laws.

General Information

Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the fund. However, Rule 12d1-4 permits registered investment companies to invest in the fund beyond the limits in Section 12(d)(1), subject to certain terms and conditions, including that such investment companies enter into an agreement with the trust.

Financial Highlights

The financial highlights tables are intended to help you understand the fund's financial performance for the fiscal periods indicated. Certain information reflects financial results for a single fund share. The total returns in the table represent the rate that an investor would have earned on an investment in the fund, assuming reinvestment of all dividends and distributions. This information has been audited by Ernst & Young LLP, an independent registered public accounting firm, whose report, along with the fund's financial statements, are included in the annual report, which is available upon request.

	<i>For the Period From November 3, 2022^a to October 31, 2023</i>
Per Share Data (\$):	
Net asset value, beginning of period	25.00
Investment Operations:	
Net investment income ^b	1.22
Net realized and unrealized gain (loss) on investments	0.65 ^c
Total from Investment Operations	1.87
Distributions:	
Dividends from net investment income	(1.13)
Return of capital	(0.04)
Total Distributions	(1.17)
Transaction Fees ^b	0.00 ^d
Net asset value, end of period	25.70
Market Price, end of period	25.76
Net Asset Value Total Return (%)^e	7.33^f
Market Price Total Return (%)^e	7.56^f
Ratios/Supplemental Data (%):	
Ratio of total expenses to average net assets	0.65 ^g
Ratio of net investment income to average net assets	4.46 ^g
Portfolio Turnover Rate ^h	53.98
Net Assets, end of period (\$ x 1,000)	14,137

^a Commencement of operations.

^b Based on average shares outstanding.

^c In addition to net realized and unrealized gains (losses) on investments, this amount includes an increase in net asset value per share resulting from the timing of issuances and redemptions of shares in relation to fluctuating market values for the fund's investments.

^d Amount represents less than \$0.01 per share.

^e Net asset value total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, and redemption at net asset value on the last day of the period. Net asset value total return includes adjustments in accordance with accounting principles generally accepted in the United States of America and as such, the net asset value for financial reporting purposes and the returns based upon those net asset values may differ from the net asset value and returns for shareholder transactions. Market price total return is calculated assuming an initial investment made at the market price at the beginning of the period, reinvestment of all dividends and distributions at market price during the period, and sale at the market price on the last day of the period. Total investment returns calculated for a period of less than one year are not annualized.

^f The net asset value total return and the market price total return is calculated from fund inception. The inception date is the first date the fund was available on Cboe BZX Exchange, Inc.

^g Annualized.

^h Portfolio turnover rate is not annualized for periods less than one year, if applicable, and does not include securities received and delivered from processing creations or redemptions.

NOTES

For More Information

BNY Mellon Global Infrastructure Income ETF

More information on the fund is available free upon request, including the following:

Annual/Semi-Annual Report

The fund's annual and semi-annual reports describe the fund's performance, list portfolio holdings and contain a letter from the fund's manager discussing recent market conditions, economic trends and fund strategies that significantly affected the fund's performance during the period covered by the report. The fund's most recent annual and semiannual reports are available at www.im.bnymellon.com.

Statement of Additional Information (SAI)

The SAI provides more details about the fund and its policies. A current SAI is available at www.im.bnymellon.com and is on file with the Securities and Exchange Commission (SEC). The SAI is incorporated by reference (and is legally considered part of this prospectus).

Portfolio Holdings

BNY Mellon ETF Trust discloses, at www.im.bnymellon.com, the identities and quantities of the securities held by the fund. A complete description of the fund's policies and procedures with respect to the disclosure of the fund's portfolio securities is available in the fund's SAI.

How to Request the SAI, the Fund's Annual and Semi-Annual Reports, and Other Information about the Fund, and to Make Shareholder Inquiries

By telephone (toll-free). Call 1-833-ETF-BNYM (383-2696) (inside the U.S. only)

By mail.

BNY Mellon ETF Trust: www.im.bnymellon.com

This prospectus does not constitute an offer or solicitation in any state or jurisdiction in which, or to any person to whom, such offering or solicitation may not lawfully be made.

No person has been authorized to give any information or to make any representations other than those contained in this prospectus in connection with the offer of shares of the fund, and, if given or made, the information or representations must not be relied upon as having been authorized by the trust or the fund. Neither the delivery of this prospectus nor any sale of shares of the fund shall under any circumstance imply that the information contained herein is correct as of any date after the date of this prospectus.

Dealers effecting transactions in shares of the fund, whether or not participating in this distribution, are generally required to deliver a prospectus. This is in addition to any obligation of dealers to deliver a prospectus when acting as underwriters.
